

14 SEPTEMBER 2018 – 8:00-17:00

1ST EUROPEAN TRANSITION SYMPOSIUM

We are delighted to organize the first European Symposium on Transition that will take place at the Lausanne University Hospital. **Transition from pediatric to adult care for adolescents with chronic illness** has been a growing theme of interest in clinic as well as in research for the past 2 decades. A realm of literature has come out on the subject and many transition programs have arisen. However, everyone has been doing it very much independently from one another. Now the time has come to put our knowledge and expertise together. The **aim of this symposium** is to **gather experts in transition from around Europe in order to share experiences and think together on where to go from now on**. We are looking forward to welcoming you in Lausanne!

This symposium is ideal for: Professionals working with children and/or adolescents with chronic illness (educators, nurses, psychologists, physicians, researchers, social workers, teachers, etc.) wishing to develop or implement a transition program in their clinic, or to share their experience in transition; Students undertaking a masters or PhD on the subject of chronic conditions/transition.

Prof. Joan-Carles Suris

Dre Christina Akre

 IUMSP - Institut universitaire de
médecine sociale et préventive

Organized by: IUMSP, CHUV,
